5 AI MOVES EVERY CARIBBEAN BUILDER MUST MAKE NOW

The 5 highest-leverage AI actions you can take this week — no tech background required, no budget needed, results in 48 hours.

FREE · INSTANT · ACTIONABLE

"AI is not the future. For those who move now, it is the present."

— Major Dream Williams

By Major Dream Williams · majordream.gumroad.com

The Gap Is Closing. You Need to Move.

Every week that passes without you using AI is a week that others are using it to build faster, earn more, and reach further. The tools are free or cheap. The barrier is not access — it is knowing where to start.

This guide gives you exactly that: 5 moves, ranked by impact, that any Caribbean builder — entrepreneur, creator, student, or community leader — can execute this week. Each one takes under 2 hours. Each one compounds.

These are not tips from a Silicon Valley playbook. They are moves built specifically for builders like you — people who carry culture, face unique market constraints, and are building something that matters beyond a personal exit.

01

Build Your AI Content Engine

Time: 90 minutes · Cost: Free · Pillar: 3 — Gamified Education

If you create content — posts, newsletters, podcasts, videos — you are leaving 80% of your output on the table by not using AI to multiply it.

The Move

Take ONE piece of content you already created this week — a voice note, a post, or even a conversation — and use Claude or ChatGPT to transform it into 5 different pieces: a LinkedIn post, an Instagram caption, a tweet thread, a newsletter paragraph, and a short video script.

The Prompt

"Here is [your content]. Rewrite this as: (1) a 3-post LinkedIn series, (2) an Instagram caption with 5 hashtags, (3) a 5-tweet thread, (4) a 150-word newsletter opener, (5) a 60-second video script. Voice: confident, Caribbean, culturally grounded."

Why It Matters

One piece of authentic content becomes five. Your reach multiplies without multiplying your time. This is Pillar 3 in practice — your knowledge becomes a system.

02

Map Your Diaspora Network With AI

Time: 45 minutes · Cost: Free · Pillar: 1 — Diaspora Empowerment

Your network is your greatest asset. Most people have never mapped it intentionally. AI makes the mapping fast and strategic.

The Move

Open any AI tool. Paste in the names and roles of 20 people in your professional network (no personal details — just names and what they do). Ask it to map connection opportunities, identify skill gaps in your network, and suggest 5 people you should reconnect with this month.

The Prompt	"Here are 20 people in my professional network: [list]. I am building [your goal]. Identify: (1) who I should reconnect with this month, (2) what skill gaps exist in my network, (3) who could make the most powerful introduction, (4) what I should offer before I ask for anything."
Why It Matters	Brain Circulation — Pillar 1 — starts with knowing who is in your orbit. This move turns a vague sense of "I know people" into a strategic map you can act on immediately.

0
3

Design Your 30-Day Learning Sprint

Time: 60 minutes · Cost: Free · Pillar: 3 — Gamified Education

Most people learn randomly. A sprint makes learning a game — with a clear goal, a daily habit, and a real output at the end.

The Move	Choose one skill you want to build in the next 30 days. Use AI to generate a complete day-by-day learning plan: what to study, what to practice, what to build, and what to ship on Day 30.
The Prompt	"I want to learn [skill] in 30 days. I have 20 minutes per day. My goal is to produce [specific output] by Day 30. Generate a day-by-day plan with: daily focus, one practice task, and a milestone check on Day 7, 14, 21, and 30. Keep it Caribbean-relevant and culturally grounded."
Why It Matters	A structured sprint turns good intentions into compound growth. The output at Day 30 becomes proof of your capability — portfolio, credibility, and leverage all in one.

4

Write Your Sovereign Value Proposition

Time: 30 minutes · Cost: Free · Pillar: 2 — Mindset Shift & Resilience

Most people cannot clearly articulate what makes them irreplaceable. If you cannot say it, no one else will say it for you.

The Move	Use AI to help you draft your Sovereign Value Proposition — a one-paragraph statement of who you are, what you uniquely offer, who you serve, and why your Caribbean/diaspora perspective is a feature, not a background detail.
The Prompt	"Help me write my Sovereign Value Proposition. Here is what I do: [description]. Here is my background: [Caribbean/diaspora context]. Here is who I serve: [audience]. Make it bold, culturally proud, and business-sharp. End with one sentence that makes someone want to hire or follow me immediately."
Why It Matters	Pillar 2 says: your identity is your advantage. This move puts that on paper. Use it in your bio, your pitch, your DMs, and your Gumroad page.

05

Write the First Page of Your Legacy Document

Time: 45 minutes · Cost: Free · Pillar: 10 — Legacy & Long-Term Impact

Most people never write down their legacy. The ones who do make different decisions every day.

The Move	Use AI to help you draft the first page of your Legacy Document — specifically: your Legacy Statement (one powerful paragraph), your core values (3-5), and the first thing you want your great-grandchildren to know about you.
The Prompt	"Help me write the opening of my Legacy Document. My name is [name]. I am from [island/community]. I am building [your work]. My deepest values are [list]. Write: (1) a powerful one-paragraph Legacy Statement, (2) my 3-5 core values with one sentence each, (3) a message to my great-grandchildren in 100 years. Make it real, cultural, and lasting."

Why It Matters

The Legacy Document changes how you make decisions today. When you know what you are building for, short-term distractions lose their power. This is Pillar 10 — activated in 45 minutes.

WHAT COMES NEXT

5 Moves Is Just the Beginning.

You have just activated the entry level of the Major AI Mindset. These 5 moves touch Pillars 1, 2, 3, and 10. The full framework has 10 Pillars — and when all 10 are active in your life and work, the compound effect is unlike anything a single tool can produce.
